AURORA SOFTWARE

ENGINEERING CONFIDENTIALITY

CONTRACT TITLE: Mutual Engineering Confidentiality Undertaking
CONTRACT ID: C13
CONTRACT TYPE: nda
EFFECTIVE DATE: 2026-12-20
PARTY A: Aurora Software Private Limited (the "Company")
PARTY B: Forge Electronics Private Limited (the "Counterparty")
GOVERNING LAW: India

THE UNDERTAKING

In consideration of exchanging engineering information, each signatory gives the following promises to the other. The undertaking protects the exchange; it is not an order for hardware or an intellectual-property license.

1 PERSONS BOUND

1.1 Aurora Software Private Limited (P01) and Forge Electronics Private Limited (P02) are each a Discloser when providing information and a Recipient when receiving it. No payment is due merely for entering this undertaking.

2 PROTECTED MATERIAL

2.1 Engineering drawings, source code, controller test reports and credentials disclosed in confidence are Protected Material. Information already public without breach, independently developed or lawfully obtained without restriction is excluded.

3 RECIPIENT PROMISES

3.1 The Recipient shall use Protected Material solely for evaluating and implementing the parties integration work, limit access to personnel with a need to know and equivalent confidentiality duties, and apply reasonable access controls.

3.2 A mandatory legal disclosure requires prior notice where permitted and disclosure only to the required extent. No ownership, sublicensing or general commercialization right is granted.

4 PERIOD OF PROTECTION

4.1 The exchange period is 2026-12-20 through 2027-12-19, without auto-renewal. Confidentiality continues for 3 years after each disclosure. Either party may end future exchanges on 15 days notice, without releasing accrued duties.

5 RETURN OR DESTRUCTION

5.1 On an evidenced written request, the Recipient shall return or destroy the specified material and supply a signed attestation by 17:00 UTC on the tenth calendar date following receipt. Dispatch of a request alone is insufficient.

5.2 Copies legally required to be retained must be identified, segregated and remain protected. No legally required retention is presumed without evidence. An attestation must identify the request and material inventory.

6 RELIEF AND LIMITS

6.1 A delayed return attestation permits a request for performance, injunctive relief and supported damages but carries no fixed return-delay fee. Each party bears third-party claims caused by its own unauthorized disclosure; an unknown damages amount is not zero.

6.2 For a proven unauthorized disclosure, the responsible Recipient owes INR 100,000 for each distinct unauthorized recipient, capped at INR 300,000 in total under this undertaking. Disclosure evidence must identify the protected material and recipient. A missing return attestation does not itself prove a disclosure and must not trigger this sum.

7 GENERAL PROMISES

7.1 Neither party may assign the undertaking without written consent. Applicable privacy law governs personal data in the exchange. Force majeure does not make an intentional disclosure permissible. The parties first seek resolution between legal contacts; Bengaluru courts and Indian law govern remaining disputes.

8 SIGNED UNDERTAKING

8.1 Mira Sen for Aurora and Anil Das for Forge record execution on 2026-12-19. Legal notices use aurora-legal@aurora.example and notices@forge.example. UTC and calendar days apply.

ANNEX A - INITIAL INFORMATION INVENTORY

Entry	Material	Custodian
Row 1	AX-7 interface drawings	Aurora engineering
Row 2	Connector source specification	Forge engineering
